

My family does NOT want LPFM stations to take precedence over FM translators. This is the only station I can listen to without worrying about what my children will listen to. You will leave millions of Christian listeners without a commercial free radio station with positive and encouraging music as opposed to the hate music so popular on radio stations currently. Stations like K-LOVE draw teenagers and young adults away from the violent music and give them positive values - about loving God and our neighbors. Please do not let this station disappear from our airwaves!
